

BlueLink Terms of Service

BlueLink Risk Disclosure Statement

This Risk Disclosure Statement provides users of the BlueLink platform (“you”) with information regarding the risks associated with participating in digital asset transactions, blockchain activities, and tokenized financial instruments offered by BlueLink.

By using BlueLink Services, you acknowledge and accept the following risks:

1. Market Volatility

The value of cryptocurrencies and digital tokens can fluctuate significantly due to market trends, regulatory changes, economic factors, and public sentiment. You may experience significant gains or losses, including the potential loss of your entire investment.

2. Tokenized Stock and Asset Risks

Trading tokenized equities and other real-world assets carries additional regulatory, custodial, and settlement risks. These assets may be subject to legal and jurisdictional restrictions or may become illiquid due to lack of demand or delisting.

3. Regulatory and Legal Risks

Regulatory frameworks surrounding digital assets vary by country and are subject to rapid change. Legal actions, new laws, or enforcement measures could materially impact the availability, legality, and performance of BlueLink Services.

4. Counterparty and Custodial Risk

BlueLink partners with licensed custodians and financial institutions. However, there remains a risk that a third-party service provider may fail to safeguard assets, experience insolvency, or be subject to regulatory seizure.

5. Operational Risks

Technical failures, cyberattacks, user error, system downtime, or software vulnerabilities may disrupt platform functionality or result in loss of funds. BlueLink takes robust measures to mitigate these risks but cannot eliminate them entirely.

6. Liquidity Risk

Certain assets may have limited trading volume, resulting in difficulty entering or exiting positions without significant price impact. BlueLink does not guarantee liquidity for any listed asset.

7. Security Risk

While BlueLink employs industry-standard encryption, multi-sig wallets, and KYC/AML safeguards, security breaches, phishing attacks, and loss of private keys may result in unauthorized access or irreversible losses.

8. Leverage and Margin Risk (If Applicable)

Using leverage or margin trading (if supported) can amplify both gains and losses. This increases the risk of rapid liquidation and margin calls.

9. Technology and Smart Contract Risks

Digital assets on BlueLink Blockchain may rely on smart contracts, which carry inherent risks such as bugs, exploits, or malfunctions. Though audits are conducted, no system is completely error-free.

10. Jurisdictional Exclusions

Certain jurisdictions prohibit or restrict access to digital asset platforms. Users are responsible for ensuring they are legally eligible to use BlueLink Services in their region.

11. No Guarantees or Investment Advice

BlueLink does not offer financial, tax, or legal advice. All decisions to buy, sell, or hold assets are made at your own risk. Past performance is not indicative of future results.

12. Acknowledgement and Acceptance

By accessing and using BlueLink, you confirm that you understand and accept these risks. You agree that BlueLink is not liable for losses or damages arising from market fluctuations or service interruptions.
